Bacon Rind Fire Incident Action Plan

Thursday August 23, 2018 Custer Gallatin National Forest

SAFETY MESSAGE

SNAG & GREEN TREE HAZARDS

Falling SNAGS and GREEN trees kill and injure a lot of wildland firefighters each year. Snags and green tree hazards may be getting more serious as western forests become stressed from crowding and insect/disease outbreaks that weaken and kill trees. While personnel should be aware of the extreme hazards posed by hazard trees in the fire perimeter, the hazard is also extremely high in the adjoining forest. Dead lodgepole may fall anywhere, even without wind. Lookouts should be alert to any changes in winds and the development or appearance of thunder cells, as any downdraft is likely to bring down trees. Alert personnel of these observations immediately!

The following is a snag/green tree hazard alert checklist.

- Snags/green trees are falling or have fallen in work area.
- Hazard tree indicators are present in work area.
- High-risk tree species are in work areas (spruce, dead lodgepole, subalpine fir).
- Crews are working in a hazard tree area at night.
- Crews are working in a hazard tree area and the wind is blowing.
- Crews are working in an area where trees have been burning for some time.
- The operational period briefing did not include a discussion of hazards.
- Crewmembers are taking a break in a hazard tree area (staging, drop points, etc).
- Lookouts have not been posted in, or overlooking, a hazard tree area.
- Lookouts are not advising the crew of the presence of hazard trees.
- Winds are increasing or are predicted to increase.
- Tree height within fire perimeter equals or exceeds distance to control line.
- Escape routes pass through hazard tree area.

Safety Officers: Dennis Talbert, Russell Owen(t)

ICS Form 202

		1. INCIDENT NAME	2. DATE	3. TIME
INCID	ENT OBJECTIVES	Bacon Rind	8/23/2018	0700
4. OPE	RATIONAL PERIOD (DATE/TIME)			

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Leader's Intent:

The highest priority will be focused on minimizing risk to firefighters and the public, by continually using the risk management process.

It is the expectation that every person assigned in any type of leadership role does a risk assessment and provides the appropriate mitigation measures prior to engaging in any activity. If a hazard cannot be mitigated to an acceptable level, the issue will be elevated to the next level.

Management Requirements:

- Ensure firefighter and public safety is the first priority in every operation.
- Maintain and develop relationships with adjacent communities, agencies, cooperators, concessionaires and other stakeholders while providing timely and consistent information coordinated with the USFS. A common message will be communicated thru all channels.

Incident Objectives

- 1. Minimize impacts to identified values at risk, including Black Butte Ranch, Elkhorn Ranch, Highway 191, powerline corridors, and trail infrastructure.
- 2. Balance resource value with suppression impacts; where and when appropriate, allow fire to play its natural role in the wilderness ecosystem as a process of ecological change.
- 3. Minimize impacts to natural and cultural resources, watersheds, and threatened and endangered species. Minimize suppression impacts in the Lee Metcalf Wilderness by allowing no mechanized equipment unless approved by the line officer.

 Minimize potential bear/human in Food Storage Special Order 36 C 			
6. WEATHER FORECAST FOR OPERATIONAL	PERIOD	*See attached	
7. GENERAL SAFETY MESSAGE	*See attached		
Primary risk factors are remote and aviation hazards.	l isolated work area	s requiring a function	ning communication system and
One of the greatest incident risk is di	riving Hwy 191. Bewa	are of your safety and	l public watching the fire.

Fire Weather Forecast

RAWS Station at fire

Spot Forecast for Bacon Rind...USFS National Weather Service Billings MT 315 PM MDT Wed Aug 22 2018

Forecast is based on forecast start time of 0700 MDT on August 23. If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

.THURSDAY...

A weather system over Idaho will track east across the region tonight. This will bring a good chance of wetting showers and possibly some thunderstorms over the fire site tonight into early Thursday. Expect best chance of showers between 5 PM Wednesday and 1 AM Thursday, slowly decreasing thereafter. Some of the showers overnight may produce erratic winds with gusts to 40 mph possible. Expect warmer afternoons and drier conditions through Friday. Westerly winds will pick up behind this weather system Thursday, especially over the ridges. BT

Sky/weatherSunny. An isolated rain shower possible early in the morning.
LAL1no thunderstorms.
Max temperature68-76 at bottom elev to 60-66 at upper elev.
Min humidity18-25 percent at bottom elev and 24-32 at upper elev.
Wind (20 ft)
Slope/valleyWest winds 5 to 10 mph.
RidgetopWest 15 to 25 mph.
Mixing height200 ft AGL in the morningincreasing to 8100 ft AGL in the afternoon.
Transport windsWest 10 to 20 mph.
Haines index3.
CWR0 percent.
THURSDAY NIGHT
Sky/weatherClear.
LAL1no thunderstorms.
Min temperature39-46.
Max humidity52-64 percent at lower elev to 72-86 at upper elev.
Wind (20 ft)
Slope/valleySouthwest winds 5 to 10 mph.
RidgetopWest 15 to 25 mph.
Mixing height8100 ft AGL in the eveningdecreasing to 100 ft AGL overnight.
Transport windsSouthwest 10 to 20 mph.
CWR0 percent.
FRIDAY
Sky/weatherSunny.
LAL1no thunderstorms.
Max temperature71-77 at bottom elev to 63-69 at upper elev.
Min humidity17-23 percent at bottom elev to 22-31 percent at upper elev.
Wind (20 ft)
Slope/valleySouthwest winds 5 to 15 mph.
RidgetopSouthwest 15 to 30 mph.
Mixing height100 ft AGL in the morningincreasing to 11600 ft AGL in the afternoon.
Transport windsSouthwest 15 to 25 mph.
Haines index5.

7. CONTROL OPERATIONS

Task: Monitor fire progression and smoke impacts from Hwy 191. Implement holding actions as needed along Hwy 191. Continue implementing fuels projects and providing lookouts.

Purpose: Provide for public and firefighter safety. End State: Ensure efficient traffic flow on Hwy 191.

8. SPECIAL INSTRUCTIONS

- Coordinate actions with other operational resources and law enforcement as needed.
- Monitor Management Action Points as necessary based on observed and modeled fire behavior to emphasize strategic planning and sound risk decision making.
- If fire spots east of Hwy 191 suppress with resources on incident.
- Do not draft out of the Madison River for the Bacon Rind fire; the Madison River water needs to stay in the Madison drainage and the Gallatin River water needs to stay in the Gallatin drainage due to aquatic invasive species!
